

ALBERTO ANGELI, MD, PhD

Date of birth: 11.17.1938

Civil state: married, two sons, two grandsons

University degree: Medicine, University of Turin, 1962

Qualification: Endocrinology and Metabolism; Internal Medicine, University of Turin, 1964-1967

Fellowships and Research Stages: University of Wroclaw, Poland; The National Institutes of Health, Bethesda, USA; University of Minnesota, Minneapolis, USA; The Rockefeller University, New York, USA, 1962-1984

Positions

Professor Emeritus, Internal Medicine, University of Turin

Associate Professor, Internal Medicine, University of Turin, 1981-1986

Full Professor, Internal Medicine, University of Turin, 1986-2009

PhD in Endocrinology and Metabolism, University of Rome, 1973

Dean of the Faculty, Postgraduate School in Endocrinology and Metabolism, University of Turin, 1995-1998

Dean of the Faculty, Postgraduate School in Internal Medicine, University of Turin, 2000-2009

Director, Division of Internal medicine, University Hospital San Luigi, Orbassano, Turin, 1987-2009

Director, Department of Medicine, University Hospital San Luigi, Orbassano, Turin, 1999-2009

Member, Ethical Committee, University Hospital San Luigi and Piedmont Region

Funds and Acknowledgments

Principal Investigator of researches granted by Consiglio Nazionale delle Ricerche (CNR), Ministero della Ricerca Scientifica e Tecnologia (MURST), Agenzia Spaziale Italiana (ASI), Ministero della Salute, Regione Piemonte, and several private institutions, 1982-2009

Member of Council of scientific societies: Italian Society of Internal Medicine; Italian Society of Endocrinology; Italian Society of Mineral Metabolism; Italian Society of Chronobiology, 1985-2009

President, Italian Study Group for Glucocorticoids and Bone, 1999-2010

Representative for Italy in international Study Groups for issues on adrenal disease, endocrine rhythms, endocrine effects of doping in athletes, 1995-2009

First Prize for Excellence in Published Clinical Research, The Endocrine Society, 2003

Referee of international, peer-reviewed journals

Invited speaker in international meetings and invited participant in international consensus conferences.

Areas of Clinical Research

Hypothalamic-pituitary-adrenal axis, with attention to circadian rhythms, glucocorticoid secretion in various disease states, adrenal masses, adrenocortical carcinoma. Sports endocrinology. Neuroendocrine-immunology. Osteoporosis and bone metastases, with attention to glucocorticoid-induced osteoporosis, prostate cancer.

Principal author or co-authors of more than 300 scientific papers, including chapters of books and editorials in international journals.

Editor of scientific books in the field of Endocrinology and Bone Research (Annals NY Acad Sci; S.Karger, Frontiers in Horm Res).
